CAREER OBJECTIVE

Software QA Engineer with 4+ years of experience in manual and automated testing across web, API, and SaaS platforms. Skilled in Playwright, Cypress, Selenium, Postman, and CI/CD integration. Passionate about driving QA excellence, mentoring teams, and optimizing test automation strategies. Seeking to transition into leadership roles to improve QA practices, enhance software quality, and streamline Agile delivery pipelines.

PROFESSIONAL EXPERIENCE

Software QA Engineer | Nifty IT Solution, Dhaka | Aug 2025 – Present

- Designed & executed manual and automated test cases using Playwright, Postman, and GraphQL.
- Performed regression, performance, and API testing; integrated automation into CI/CD pipelines.
- Collaborated with developers & PMs to identify defects early and improve release quality.
- Documented bugs in detail and recommended process improvements for smoother releases.

Software QA Engineer | Next Level Media Bangladesh (Remote, US HQ) | Mar 2025 – Jul 2025

- Ensured quality of a cloud-based CRM SaaS platform (client management, workflows, sales tracking).
- Executed manual & automated tests across multiple modules, improving coverage & transparency.
- Conducted performance testing during release cycles to ensure stability under load.
- Authored test plans, cases, and reports, enhancing test maturity and communication.

Associate Software Development Engineer in Test (SDET) | Together Initiatives (P) Limited, Dhaka | Apr 2022 – Feb 2025

- Developed and maintained automation frameworks using Cypress and Playwright.
- Automated UI and API test cases, integrated test runs with GitHub Actions CI/CD.
- Improved release cycles by introducing automation in regression and smoke testing.
- Collaborated with developers on test strategy design, ensuring high-quality releases.

Junior SQA Intern | Together Initiatives (P) Limited, Dhaka | Aug 2021 – Mar 2022

- Conducted manual & automated testing, logged issues via JIRA.
- Assisted in API test automation using Postman.
- Contributed to initial automation scripts and process improvements for execution efficiency.

TECHNICAL SKILLS

Test Automation: Cypress, Selenium, Playwright.

API Testing: Postman, K6, JMeter (load testing)

CI/CD & DevOps: GitHub Actions, Jenkins.

Languages: JavaScript, Java.

Testing Types: Functional, Regression, Performance, API, Security, Smoke, UAT

Tools: JIRA, TestRail, Trello, Docker, Git (GitHub/Bitbucket)

Methodologies: Scrum, Kanban.

PROJECTS

Absorb LMS — Learning Management System

- Automated UI & API workflows (course creation, user management, assignments).
- Integrated test suites into CI/CD pipelines, reducing feedback loop times.
- Led regression and smoke testing, catching defects early in SDLC.

ConnexPay – FinTech Payment Platform

- Automated payment gateway and transaction validation using Selenium WebDriver.
- Conducted manual testing of payment flows for compliance.
- Developed API automation to improve test accuracy and coverage.

MyManager CRM Portal

- Performed end-to-end testing of workflow-driven CRM operations, covering client onboarding, task fulfillment, automated triggers, and exception handling.
- Designed automation suites for state-based workflows, routing logic, and data reconciliation scenarios, with execution integrated into CI/CD pipelines.
- Verified cross-module data synchronization and defect resolution across UI and backend services, ensuring process assurance and operational reliability.

Denowatts Performance Portal (Current)

- Validated commissioning workflows & energy data reporting features.
- Automated critical workflows to ensure stability in production.
- Collaborated with product/data teams to enhance solar performance tracking.

EDUCATION

Bachelor of Science (BSc) in Computer Science and Engineering

Port City International University, Chittagong
